Point of Sale

*From Retail to Restaurants –
A POS for Every Need*

Shop, Shop Touch, Dine-In, POS Standalone

Our POS software is ideal for all businesses; from pharmacies, cafes, restaurants to supermarkets – it works like a charm. Configure the software according to your business needs for augmented retail productivity and customer satisfaction. Streamline multiple in-store functions in one go with our dynamic and centralized management tool.

Web Based Application Compatible with POS Machine, Desktop, Laptop and Tablet

Shop

Increase your store efficiency in managing wide variety of items through Barcode scanning and reduce queue length by fast billing.

Quick Billing Process

- Scan barcodes of items from the cart to add those in bill swiftly.
- Hold & Release invoices at anytime to reduce rework.

Product Return & Replacement

- Can configure return rules to support un-interrupted returns.
- Issue token for replacement which can be utilized in future purchase.

Shop Touch

List and choose your items from Tile view or by scanning barcodes. Group your products with multi level classification for the ease of selection.

Quick Billing Process

- Scan barcodes of items from the cart to add those in bill swiftly.
- Listing items in card view under multi-level category makes selection easier.
- Hold & Release invoices at anytime to reduce rework.

Product Return & Replacement

- Can configure return rules to facilitate un-interrupted returns.
- Issue token for replacement which can be utilized in future purchase.

Dine-In

Serve your customers for Take Away, Pre-Order and Dine-In services. Waiter Application can be used to manage tables and take orders from occupied tables.

- Listing items in card view under multi-level category makes selection easier.
- Pre-order your food through phone call so that food gets prepared before you reach the restaurant
- Use integrated waiter application to manage tables, take orders and intimate kitchen through auto-generated KOT.
- Manage your take away orders with faster selection of items through touchscreen user experience.
- Group your menu items using course functionality to serve the food in organized manner.
- Provide customer receipt on table after check-out for payment reference.
- Print KOT's Kitchen-wise based on the cuisine ordered.
